Our Retro Look Lambretta/Vespa EV3000 electric scooter, not Artisan, incorporates avant-garde technology with a timeless classic design to contend with an ever changing, greener, world. The 60Volt 3KW hub motor provides more than ample power to smoothly and silently propel this scooter to 40 mph and is supplied with one rechargeable Lithium-Ion battery which is capable of giving a range of around 30 miles. The battery can be charged from a 13amp socket in 6 hours with the charge pack supplied. This moped benefits from a digital instrument display, hydraulic disk brakes front and rear, a side stand as well as a centre stand, a rear rack with top box, a front rack and fly-screen, all of which are optional extras which we have included as part of our package. The EV3000 also features a bespoke remote alarm system with audible 'find me' vehicle identifier, lockable storage compartments, two sets of keys and weighs 100kg and is capable of carrying two people up to 150kg.
